Office Action Summary

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wood et al. Wood teaches in column 16-17 making a Pd catalyst (with promoters), reducing it and storing it in inert gas. Shipping/selling it is an obvious expedient to make a profit and preventing re-oxidation is an obvious expedient to preserve the catalytic activity. Using the claimed gases is an obvious expedient to provide an inexpensive preservative; the examiner takes Official Notice that nitrogen helium, etc. claimed are old and known as nonoxidizing. Method of use recitations (claims 11-13) do not limit the catalyst. Using the claimed promoters in the claimed amounts is an obvious expedient to gain effective catalytic activity.

It is noted that the claims do not exclude the treated supports preferred by Wood. In so far as they do, Wood teaches regular alumina in column 22-25. Using promoters with it is an obvious expedient to make a more effective catalyst.

The examiner takes Official Notice that the claimed supports are old and known as catalyst supports. Using them is an obvious expedient to make a supported catalyst.

Claim 14 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Wood et al. 4748145.

Art Unit: 1754

Wood makes the same catalyst even though possibly stored differently; no differences are seen.

The examiner takes Official Notice that the claimed supports are old and known as catalyst supports.

In so far as the rejections are 'new' they were necessitated by the amendment.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
